

AI Smart Examination Report

Official Performance Evaluation Summary | Exam ID: a79abc14-983c-42de-9894-61488f047337

Candidate Name: John Doe Verification	Date & Time: 2026-08-03 18:30
Subject: Python Programming	Time Taken: 20.8 Mins
Difficulty: Intermediate	AI Provider: Mock
Score: 25 / 30	Percentage: 83.3%
Grade: A	Status: Pass

Question Evaluation Breakdown

#	Question	Your Answer	Correct Answer	Result
1	What is the primary core principle underlying Python Programming when desig...	C	C	Correct
2	In Python Programming, which architectural pattern is recommended for decou...	C	C	Correct
3	When optimizing performance in a Python Programming environment, what is th...	C	C	Correct
4	Which security best practice should be applied when managing confidential p...	B	B	Correct
5	What is the consequence of failing to validate external user input within a...	D	D	Correct
6	Which data structure is optimal for fast O(1) key-based lookups in Python P...	D	D	Correct
7	In modern Python Programming development, what does the term 'Idempotency' ...	B	B	Correct
8	How does automated unit testing contribute to overall code quality in Pytho...	A	A	Correct
9	What is the main advantage of containerization (e.g. Docker) in Python Prog...	D	D	Correct
10	Which metric is critical for monitoring system availability and health in P...	D	D	Correct
11	What is the primary core principle underlying Python Programming when desig...	A	A	Correct
12	In Python Programming, which architectural pattern is recommended for decou...	C	C	Correct
13	When optimizing performance in a Python Programming environment, what is th...	C	C	Correct
14	Which security best practice should be applied when managing confidential p...	B	B	Correct
15	What is the consequence of failing to validate external user input within a...	D	D	Correct
16	Which data structure is optimal for fast O(1) key-based lookups in Python P...	B	B	Correct

17	In modern Python Programming development, what does the term 'Idempotency' ...	D	D	Correct
18	How does automated unit testing contribute to overall code quality in Pytho...	B	B	Correct
19	What is the main advantage of containerization (e.g. Docker) in Python Prog...	C	C	Correct
20	Which metric is critical for monitoring system availability and health in P...	A	A	Correct
21	What is the primary core principle underlying Python Programming when desig...	D	D	Correct
22	In Python Programming, which architectural pattern is recommended for decou...	A	A	Correct
23	When optimizing performance in a Python Programming environment, what is th...	D	D	Correct
24	Which security best practice should be applied when managing confidential p...	A	A	Correct
25	What is the consequence of failing to validate external user input within a...	A	A	Correct
26	Which data structure is optimal for fast O(1) key-based lookups in Python P...	B	D	Wrong
27	In modern Python Programming development, what does the term 'Idempotency' ...	B	A	Wrong
28	How does automated unit testing contribute to overall code quality in Pytho...	A	B	Wrong
29	What is the main advantage of containerization (e.g. Docker) in Python Prog...	Skipped	B	Skipped
30	Which metric is critical for monitoring system availability and health in P...	Skipped	D	Skipped
